

Here's how to export a .wmv file from the FlipShare software that the FlipUltra's use. By default, the FlipUltra creates a .mp4 files that isn't compatible with Movie Maker.

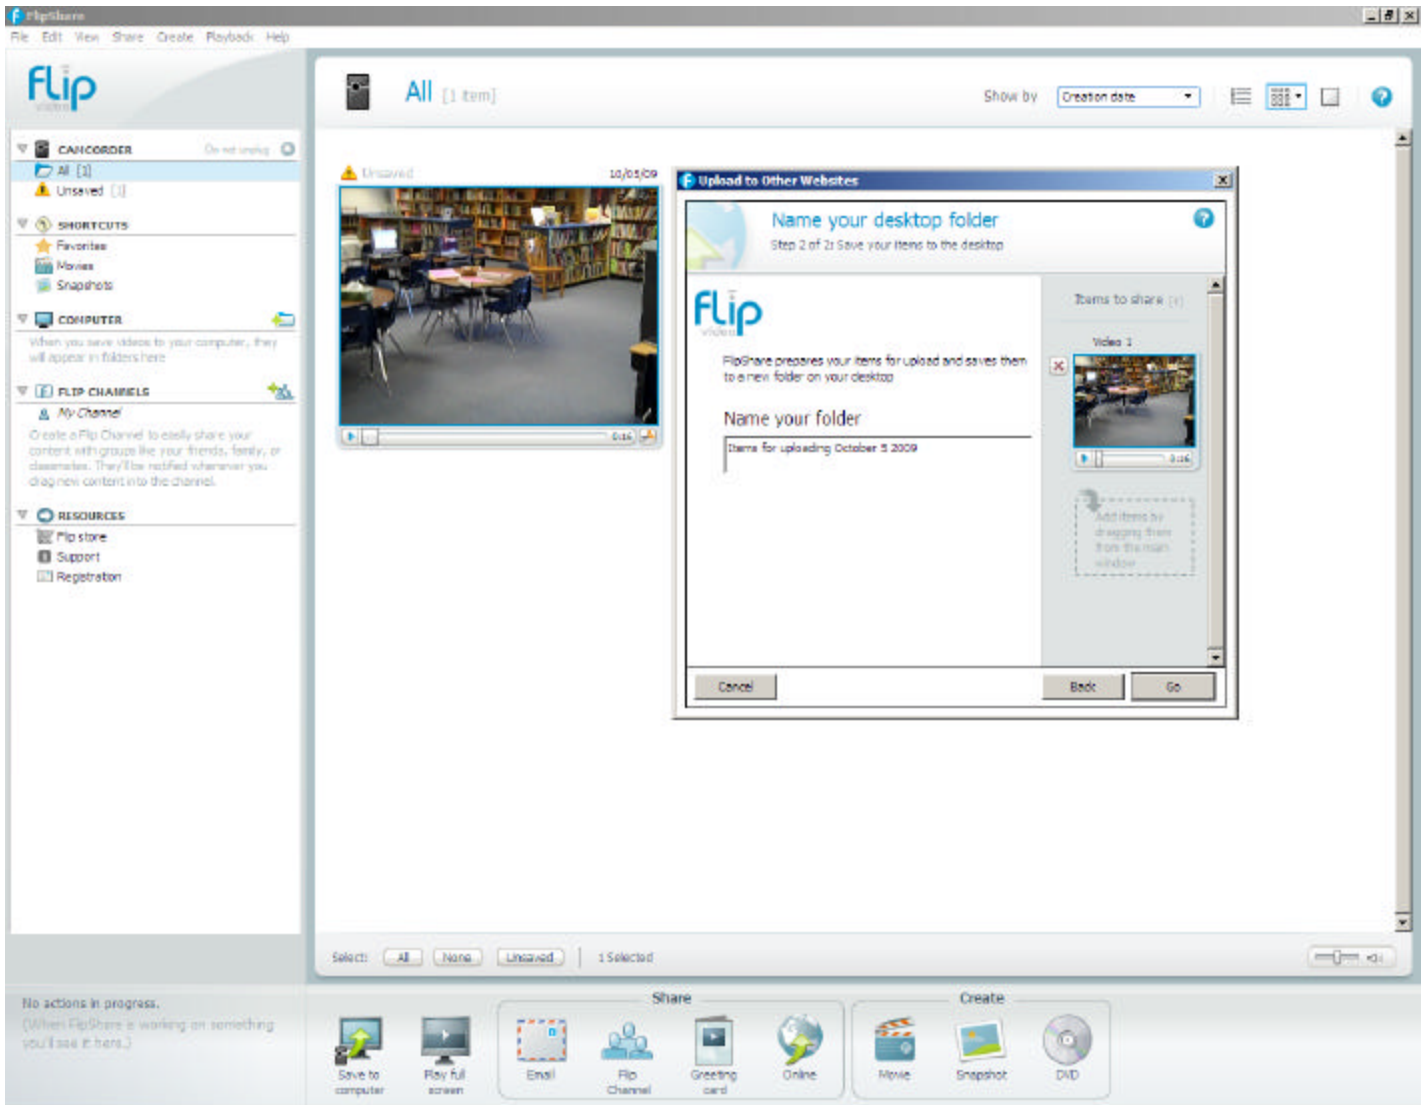

Click on Share > Online > Others

Then, you drag your video(s) into the "Items to Share" box on the right.

Click Next once your video is listed in the "Items to Share" box.

You can name the folder and click Go. It will create the folder on your desktop with the WMV file in it.

Then, you can add the file to your movie maker project.
